

EndoGrip™ Grasping Forceps

Secure Grip

A rat-tooth alligator design engineered for secure, precise control and efficient removal.

Grasping Forceps

Maximum Maneuverability

Seamless 360° control allows you to rotate the positioning barrel without letting go, ensuring secure retrieval in the GI tract.

Versatile Design

Built for demanding environments and suited for a wide range of foreign body and stent removals.

Grab-and-Hold Jaw

Rat-tooth serrated jaw design provides a firm, reliable grip to confidently retain foreign bodies or stents during retrieval.

Responsive Actuation

Resilient design ensures smooth opening and closing, even in extreme retroflex positions, for reliable performance every time.
