

# Lasso™ Rotatable Polypectomy Snare

## Optimal Control

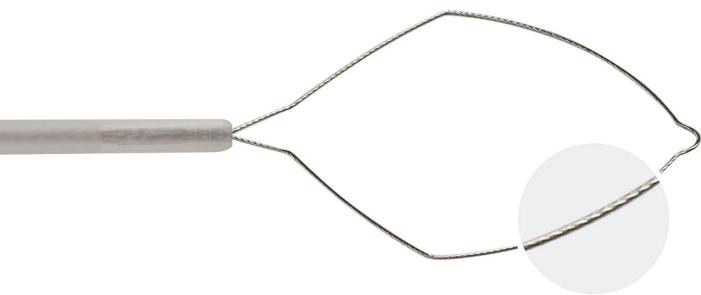

Achieve precise placement with responsive rotation and a balanced wire design to confidently secure and remove polyps.

## Polypectomy Snares

### Secure Polyp Capture

The braided wire design securely holds tissue and delivers a clean, precise cut across cold and hot/cold snares.

#### Thin Braided Wire

Rotatable **cold-only** snare with a thin (0.024") wire ensures a clean cut for flat and sessile polyps, enabling more complete resections.

#### Full 360° Rotation

An ergonomic handle and short throw enable controlled actuation with 1:1 rotation.

#### Full Portfolio

A comprehensive selection of sizes and shapes for both **hot and cold** applications.

#### 3-in-1 Snare

Utilize a single snare to accommodate multiple polyp sizes. This hot/cold hex snare is adjustable to three distinct diameters, reducing the need for multiple snares in a procedure.
